

BMW LCM Diagnosis

BMW OBDII Diagnosebelegung
LCM Programmierung über Diagnose
mit Kabel 912
+ und - alternativ aus dem Zigarettanzünder

Use the 912 plug. + and – can also be used from cigarette lighter

- ? Program the cluster and EWS first
- ? Connect the 912 cable like in the picture to the diagnostic connector in the car (older models use the round diagnosis plug)
- ? Select the menu [BMW LKM / LCM Diag](#)
- ? Old value , HW and SW number will be displayed in the Tacho Universal
- ? **Press a key and program to 0**
- ? Ignition off and on again
- ? If you read again now the LCM will have the value from cluster
